

CASE STUDY | EX-DMS

EOS Europe Launch Hazardous Area 'EX-DMS' Service

Electrical installations in potentially explosive atmospheres are a concern in all industries, especially the Oil & Gas, Petro-chemical, Pharmaceutical, Utilities industries.

EOS Europe (EOS) assist clients in the management and verification of the integrity of 'Ex' Assets by helping to develop a cost effective path towards full compliance. Through innovative processes, EOS' specially developed EX-DMS service has proven to reduce man hours by up to 33%.

Utilising a bespoke, cutting edge software package which includes EX rated industrial handheld devices, PDA's, Internet barcodes and RFID, the EX-DMS service streamlines procedures, improving efficiency and accuracy whilst providing users with an easy way to capture statutory data to easily demonstrate compliance with legislation. EX-DMS enables efficient collection and management of critical data and provides a comprehensive and auditable asset history, secure, instant reporting and fault trending.

To ensure a smooth transition when moving workers to the electronic system, existing paper based processes can be electronically replicated to allow continuity and familiarity.

The EX-DMS service encompasses:

- Ex Inspection of Existing and New Ex Equipment
- Ex Hazardous Area Inspection Strategy Development & Implementation
- Compiling Ex Registers and Client Databases
- Ensuring Verification of all Installed Ex Equipment Databases
- Ensuring Compliance with all Standards and Regulations
- Gap Analysis and Reporting of Current Ex Inspection Procedures
- Explosion Protection Documents
- Ex Installation & Maintenance Project Management
- Ex Remedial Repairs

With teams of competent inspection engineers, EOS have worked in hazardous areas over many years and are CompEx qualified for explosive gases and vapours, intrinsically safe systems and combustible dusts.

EOS' CompEx certified technicians and inspectors deliver comprehensive hazardous area inspection reports and schedules, advising on corrective action where necessary to provide assurance that your business complies with all the very latest international standards, codes and practices and meeting legal obligations.
